X-OffTM Anti-Graffiti Paint

Specify the Locker Paint that Defeats Graffiti and Prevents Vandals from Destroying the Learning Environment in Your School

X-Off Anti-Graffiti Paint provides a surface coating that allows the easy removal of graffiti and resists corrosion. This specially formulated paint has a tight molecular structure that seals the locker surface preventing graffiti and corrosive agents from penetrating the finish.

- **Protective Paint that Seals Lockers**
- **Graffiti is Easily and Completely Removed**
- **Resists Corrosive Elements**

When this tough powder coat paint finish is used, acrylic, oil, latex paints along with permanent marker and paint pens are easily and completely removed with the Special Cleaning Agent. All graffiti is completely removed without changes in appearance such as ghosting, staining or shadowing.

The Special Cleaning Agent is available in a spray bottle. It allows graffiti to be removed without the use of hot water or high-pressure wash equipment. X-Off Anti-Graffiti Paint is capable of withstanding a minimum of 120 cleaning cycles over the same area without measurable coating deterioration.
